

Fact Sheet on Municipal Debt

This document discusses some common questions asked about Middlesex Centre's use of debt to finance various projects.

1. Why does Middlesex Centre need to borrow?

Borrowing is a way to finance capital projects and maintain major infrastructure over the longer term. Like most businesses, municipalities may borrow a portion of their capital requirements and pay it back over the life of the project being financed.

Municipalities do not borrow for day-to-day operations.

2. Are there any alternatives to borrowing?

When faced with the decision to build a major capital structure, Council has to make a decision on how to finance the project. Options include raising taxes that year to pay for it, reduce spending on other capital projects to make room in the current capital budget, use money that has been saved up in reserves, or borrow the funds and repay the debt using tax revenue over a period of time. Council considers debt financing when a new or one-time type of project comes along, and occasionally when major reconstruction is needed on large expensive assets.

3. Who does Middlesex Centre borrow from and can residents purchase municipal debentures as investments?

The majority of borrowing is through Infrastructure Ontario (a crown corporation of the Province of Ontario) as rates are more competitive than local lending institutions or private debenture issues, thus lowering costs to taxpayers of Middlesex Centre.

There is no direct way for local residents to invest.

4. How much debt does Middlesex Centre currently have?

Long Term Debt outstanding at the end of 2019 was \$20,840,114.

Short Term Capital Financing for Development Charges at the end of 2019 was \$13,344,000.

5. How much principal does Middlesex Centre pay off annually?

In 2019, Middlesex Centre paid out \$1,393,000 (2018: \$1,368,049) of principal and \$801,210 (2018: \$799,631) of interest payments.

6. Will Middlesex Centre be borrowing in the near future?

There are no new projects approved for borrowing by Council at this time. In 2020, with the projects funded by the short-term financing for development charges being completed, this debt will either be paid off or transferred into long-term borrowings.

7. Does Middlesex Centre have a significant amount of debt?

The Province monitors municipal debt levels and annually calculates Middlesex Centre's debt capacity and ability to repay the debt. Council is restricted by the Ministry of Finance to approve any debt that will result in total annual debt payments that will be more than 25% of Middlesex Centre's own source annual revenues. Middlesex Centre has an internal policy where the total annual debt payments does not exceed 17%. Middlesex Centre is currently below that at approximately 13%.

8. Could Middlesex Centre raise taxes or use reserves to pay off the current debt early?

Middlesex Centre has taken advantage of several Provincial and Federal programs that provided subsidized interest rates. To obtain such historically low rates there are no options for early repayment offered by the issuing agencies.

9. How do other municipalities view and use debt?

Middlesex Centre is not unique in its use of debt. Infrastructure deficits exist in most, if not all municipalities and the Provincial and Federal governments as well. Most municipalities are also choosing to borrow a portion of their capital construction needs to finance long-term assets and pay for them over the lifespan of the asset.

In conclusion, there is a need for the Municipality of Middlesex Centre to strategically use debt to invest in new assets that improve the community. It is only used on significant assets where annual lifecycle funding is not fully in place and significant tax increases would otherwise be required. As funding to shrink the infrastructure deficit increases, there will be less need for future debt issuances.
